

May 22, 2024

Dear Chair Rozic, Assemblymember Bores, Senator Fernandez, and members of the Assembly Consumer Affairs And Protection Committee,

We, Resy and the undersigned restaurant owners and operators, write to express our strong support for A.10215 / S.9365 Restaurant Reservation Anti-Piracy Bill, which aims to prohibit the unauthorized listing and resale of restaurant reservations in New York State.

Resy is a consumer-facing reservation platform for passionate diners and a digital dining platform that powers restaurants around the world, including the chefs and business owners below who represent award-winning and popular restaurants in New York City. As hospitality professionals, we aim to provide guests with exceptional dining experiences. However, the prevalence of reservation scalping and resale is undermining this goal.

This practice whereby third-party resellers are acquiring reservations and reselling them for a profit has significant negative impacts on small businesses and diners such as guest confusion and dissatisfaction, introducing additional administrative burdens, increased cancellations, and lost revenue for restaurants.

We urge you to support A.10215 / S.9365 Restaurant Reservation Anti-Piracy Bill as it will help to restore integrity to the reservation process. This bill will not only protect consumers but also support the sustainability of small business and the restaurant industry.

Sincerely,

A handwritten signature in black ink, appearing to read "PR" with a stylized flourish.

Pablo Rivero
Chief Executive Officer
Resy
